## HOW TO DO

**Proff Woodcare Wood Floor Soap** is a soft natural product used for cleaning of any kind of oiled or oiled/waxed wood floor. The soap has a dual function: it cleans the floor and leaves an invisible nourishing coat on the floor protecting against fluids and dirt from entering the grain of the wood. The soap may also be used for cleaning of any type of oiled woodwork. The soap is available in natural and white. Natural Soap is used for clear oiled floors including colour oiled floors whereas white soap is used for white oiled floors.

### **Work Instruction:**

1. Shake the soap bottle well before use.
2. Pour 125 ml of soap into 5 litre of lukewarm water. Use two buckets: 1 with soap solution and 1 with rinsing water. Use minimum quantity of soap water on the floor. Leave soap solution long enough on floor in order to dissolve dirt on floor. Remove dirty soap water from floor with mop and rinse mop in bucket with rinsing water.
3. Always wipe floor after removal of dirty soap water with hard soap wrung mop. Make sure that no puddles of water are left on the floor.
4. If the floor has been neglected and extremely dirty, a floor machine with white pad may be used for dissolution of dirt. Removal of dirty water from floor and wiping with soap water is done as under point 3.

Consumption: 1 litre to 350 to 400m<sup>2</sup> of floor
