

NEUTRALON[®]

ALGICIDE AGENT
IS YOUR ROOF FILLED WITH ALGAE?

NEUTRALON®

APPROVED ALGICIDE AGENT

Neutralon Algicide is the only approved product produced in Denmark that works against algae growth. Algae growths on roofs should be removed, otherwise nature will claim them eventually. Our wet climate provides ideal conditions for algae growth - algae feed off water, and they appear everywhere. Our trees, pollen and pollution also make our roofs

dirty and unsightly. The green algae can serve as a breeding ground for moss, and moss retains moisture which is a house's worst enemy. The moisture degrades and destroys the surfaces of the house and can lead to frost damage and a quicker deterioration of the roof.

LEGAL AND EFFECTIVE

You can expect to see Neutralon working within a few days. You will be able to see a difference, but it will take some rain, snow and wind to “sweep” the roof clean. The Department of Agroecology at Aarhus University has done studies and assessed that Neutralon Algicide is effective against algae growth - so it works!

- A Danish, approved product
- Effective algae cleaner
- Inhibits the deterioration of the roof
- Great results
- Inexpensive maintenance
- Does not discolour zinc
- Works after only a few days

Neutralon, which has been developed for professionals, is used against all types of algae on all types of hard roof surfaces, such as cement, fibre cement, concrete, tiles, wood, glass, metal, plastic, EPDM, PVC and TPO.

Newly painted roofs should also be maintained with a Neutralon algicide treatment at least every two years in order to have a durable and clean house.

NEUTRALON®

ABOUT NOWOCOAT

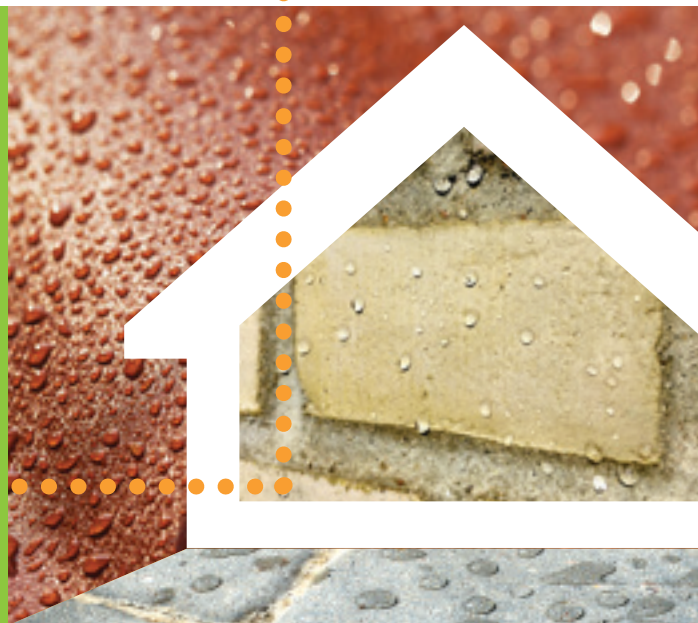

Nowocoat is a Danish coating plant with roots that go back to 1861. We are not afraid to call ourselves nerds when it comes to the coating of roofs and other surfaces of the house. We have only one thing on our minds: Making innovative and functional solutions adapted to all types of roofs, from the rainy north to the warm south. This will give you the best, most durable roofs over your heads - now, and in the future. Of course, we have also developed products that protect facades and tiles. Maybe that is why, today, we are Europe's leading producer of roof coatings.

YOU CAN PROTECT YOUR ENTIRE HOUSE!

You would like to keep your roof and the facade of your house nice and clean, and we presume that also applies to your tiles? It looks great when the house is well maintained, and we also have the products to ensure that it does. Keeping your house well maintained involves using the right cleaning agents, coatings and impregnations.

See what the options are at our website www.nowocoat.dk and get your local professional roof specialist to come by and handle the preventive work needed to ensure a well maintained house.
