## ARE YOUR TILES ALSO DIRTY?

New tiles are expensive, and placing them is a large time-consuming project. So instead, protect your old tiles with impregnation so that you increase their life expectancy and save money. The tiles are strengthened once they are impregnated with NowoSeal. It makes them more durable and increases their life expectancy.

Impregnation acts as a shield against water, because water and moisture have harmful effects on mineral surfaces. They can lead to frost damage and make holes in the tiles, and can become a breeding ground for algae, moss, etc.

# REINFORCES THE TILES

Clean and beautiful tiles are also something that makes you even more keen on having dinner on the terrace, and this impregnation inhibits stains that might be made during a good dinner with red wine, soft drinks, oils and spices.

- Extends the life expectancy
- Strengthens the surface
- Easier maintenance
- Inhibits dirt and oils
- Provides a new lease of life and adds colour
- Danish quality

The life expectancy of the tiles is increased, since the impregnation reduces the deterioration and destruction caused by water.

Maintenance is easier, and can keep the tiles on your terrace, driveway or entrance clean with an annual cleaning using Neutralon. Your local specialist can do this for you and help prevent the tiles from becoming dirty or broken.

The tiles must be cleaned thoroughly with special equipment that removes all the dirt and makes the surfaces ready for impregnation.

## ABOUT NOWOCOAT

Nowocoat is a Danish coating plant with roots that go back to 1861. We are not afraid to call ourselves nerds when it comes to the coating of roofs and other surfaces of the house. We have only one thing on our minds: Making innovative and functional solutions adapted to all types of roofs, from the rainy north to the warm south. This will give you the best, most durable roofs over your heads - now, and in the future. Of course, we have also developed products that protect facades and tiles. Maybe that is why, today, we are Europe's leading producer of roof coatings.

You would like to keep your roof and the facade of your house nice and clean, and we presume that also applies to your tiles? It looks great when the house is well maintained, and we also have the products to ensure that it does. Keeping your house well maintained involves using the right cleaning agents, coatings and impregnations.

See what the options are at our website [www.nowocoat.dk](http://www.nowocoat.dk) and get your local professional roof specialist to come by and handle the preventive work needed to ensure a well maintained house.
